MUNICIPAL AND COUNTY GIS
LISTENING SESSION

Maine Library of Geographic Information
December 11, 2014
1:00 PM to 4:00 PM
Feeney Room
Cumberland County Courthouse
142 Federal Street
Portland, Maine 04101

1:00 PM: **Welcome**
Aaron Gilpatrick, Director Information Technology
Cumberland County

1:10 PM   **GeoLibrary Board, Purpose and Programs**
Joseph Young, Executive Director
Maine Library of Geographic Information

1:30 PM   **Community GIS, Applications and Data Needs**
Aimee Mountain, Assistant Project Manager
GZA GeoEnvironmental, Inc.
Aimee will speak to how her company uses publicly available imagery, topography and other GIS data to serve client needs. Whether you are a GIS novice or community official you will learn the value of base level data sets needed to improve the quality of the mapping in your community. From basic parcel maps to more complicated economic development projects, in both private and public sectors, accurate and, current geospatial data plays a key role in your community

2:00 PM   **Emergency Services GIS, GeoSpatial Data**
Bob White,
Emergency Services Communications Bureau
Maine Public Utilities Commission

Bob will relate how the NG 911 system uses geospatial data to inform emergency service providers with the data they need to respond quickly and efficiently to emergency calls. The NG911 system uses a variety of geospatial data that is used by other state, federal, county and community entities. This session will provide community and county leaders with an understanding of how their geospatial data needs overlap with other agencies.

2:30 PM   **Open Discussion**
MUNICIPAL AND COUNTY REPRESENTATIVES
Geospatial Data acquisition costs are greatly reduced when very large geographic areas are acquired at one time. This is your chance to explain to the Board what your data needs and specifications are.
